What this workbook covers 本册讲什么

Asch and Moscovici showed *that* people yield to influence. This booklet explains **how much** — through three lenses: **individual differences (personality)** — locus of control, desire for control; **situation** — group size, unity, ambiguity, source; and **culture** — from Berry's two subsistence cultures to Smith & Bond's 133-study meta-analysis. The same lenses also decide whether a minority gets heard.

How to use this booklet 怎么用

1. **Fill it in as you go** — check the answer key (pp. 19–20) after each page.
2. **Pages 3–6 (personality) and 11–13 (culture) carry the named studies.** Redo them from memory, under time.

Content map 内容地图

Page	Topic	What you must be able to do afterwards
p.2	Three lenses 三视角	Sort any factor into person / situation / culture
p.3–4	Locus of control 控制点	Define internal/external; Biondo, Ritchie & Phares, Avtgis
p.5–6	Desire for control 控制欲	Burger & Cooper (1979); Burger (1987) numbers
p.7	Other characteristics 其他	Self-esteem, approval, anxiety, insecurity — one logic
p.8–9	Situation: size & unity 情境	Optimal majority of 3; broken majority 33% → 5.5%
p.10	Ambiguity & source 模糊与来源	ISI in uncertainty; credibility (Greta Thunberg)
p.11–12	Cross-culture scoreboard 文化记分板	Seven studies, three directions
p.13–14	Berry + Smith & Bond 文化解释	Subsistence → values → conformity; 133 studies, 17 countries
p.15	Evaluation 评价	Mixed evidence; socio-cultural factors cannot be isolated
p.16–18	Exam skills 考试技巧	2-mark formula; 8-mark cloze; 6-marker practice
p.19–20	Answer key 答案速查	Mark honestly, then re-write wrong answers in full

Revision tracker 复习打卡

☐ p.2 three lenses ☐ p.3–4 LOC + studies ☐ p.5–6 desire for control ☐ p.8–9 size & unity ☐ p.11–14 culture ☐ p.15 evaluation ☐ p.16–18 exam

The whole page in one sentence 一句话总结

How much people conform — and how readily they hear a minority — depends on **who they are** (internal locus of control, high desire for control resist), **the situation they face** (a united majority of three is strongest; a broken majority cuts conformity from 33% to 5.5%; ambiguity and credible sources raise it), and **the culture they grew up in** (cooperative, collectivistic cultures conform more — Smith & Bond, 1996).

1 · Same experiment, different people

The puzzle 引入

Thirty people, identical Asch set-up. Twenty-three conform at least once; seven never do. The situation was identical — so the difference came from **something the situation didn't contain**.

Three drawers 三个抽屉

Drawer	What goes inside
1 · Individual differences (personality)	Locus of control; d _____ for c _____; low self-esteem; need for social a _____; anxiety; insecurity
2 · Situation	Size of majority and minority; u _____ of the majority; ambiguity; s _____ of the source
3 · Culture	C _____ vs i _____ societies; how a culture gets its food (Berry)

Sort the factors 分类练习

Factor	Drawer (1/2/3)
A majority broken by one dissenter	
Growing up in a hunter-gatherer culture	
Believing luck decides your outcomes	
The person giving the message is an expert	

中文理解 三个抽屉，各放各的

人：控制点、控制欲、自尊、认可需要、焦虑、不安。
情境：规模、团结、模糊、来源地位。
文化：集体/个人主义、生计方式。
答题先判断抽屉，再拿证据。

2 · Locus of control

Key term 关键术语

Locus of control（控制点）

A belief system which determines our perception of c _____ over events that occur.

Internal vs external 对比表

	Internal	External
Belief	My a _____ decide outcomes	L _____, fate and other people decide
Pressure felt	Less pressure from o _____	Looks to o _____ for guidance
Susceptible to…	Less susceptible to n _____ social influence	More susceptible to n _____ social influence

Quick check 快问快答

"I failed the test because the paper was unfair and the examiner dislikes me." Internal or external locus — and what does this predict about their conformity?

中文理解 方向盘握在谁手里

内控＝方向盘在我手里 → 别人的意见只是参考；外控＝方向盘在别人/运气手里 → 多听听别人怎么说吧。
记法：**外控 → 依赖他人意见 → 更从众（NSI）；内控 → 反之。**

3 · Locus of control: the evidence

Three studies, one chain 三个证据

Study	What they did	What they found
Biondo et al. (1971)	Compared responses to attempts to change attitudes	**E** _____ more influenced by overt persuasion; internals reacted a _____ overt influence and ignored subtle influence
Ritchie & Phares (1969)	Varied who delivered the message	Externals more persuaded by a source of high p _____
Avtgis (1998)	M _____-analysis of LOC and social influence studies	Higher external scores went with more c _____ — but evidence is m _____, depends on type and source of persuasion

Key term 关键术语

Meta-analysis（元分析）

When a researcher gathers and analyses o _____ people's d _____ to look at effect sizes and draw conclusions about a topic area.

中文理解 三个证据一条线

Biondo（外控挡不住正面说服）＋ Ritchie & Phares（外控吃「权威来源」那套）＝ 实验；Avtgis (1998) 元分析＝合起来看，仍是外控更从众。

AO3 记得补 **but 证据不一，取决于说服的类型和来源**——这句 but 值钱。

4 · Desire for control

Key term 关键术语

Desire for control（控制欲）

Proposed by Jerry B _____ and Harris C _____ (_____): individual differences in our m _____ to control events in our environment.

High vs low 对比表

	High desire for control	Low desire for control
Typical traits	A _____, d _____, takes leadership roles	P _____, influenced by others
Predicted conformity	More likely to r _____ other opinions	More likely to be swayed

Don't mix the two "controls" 别混

Term	It is a…
Locus of control	A b _____ about where control sits（相信控制权在哪）
Desire for control	A m _____ to control things（多想掌控一切）

中文理解 belief vs desire

一个人可以相信「成绩靠努力」（内控），但并不想当班长（低控制欲）——两个不同的东西。
考试最爱把这两个词互换着骗你。

5 · Burger (1987): the cartoon experiment

The numbers 数字填空

_____ student participants were placed in groups of f _____ and asked to rate the f _____ of a cartoon on a scale of _____. Each participant gave their rating p _____, after three other participants — who were c _____ of the study — had given theirs.

Finding + design logic 设计逻辑

Detail	Why it matters
Cartoons, 1–100	No correct answer — an o _____ task, so the group "norm" is easy to measure
Answering after 3 confederates	The group norm was already e _____ before the participant's turn — Asch's set-up in disguise
Public rating	Adds n _____ pressure — the group hears your answer

Result line 结论句

Participants with a high desire for control were **l** _____ likely to conform to the group norm.

中文理解 复述公式
考试写研究就按「人数 → 分组 → 任务 → 顺序 → 结果」五件套：**55 人、4 人一组、卡通滑稽度 1–100、在 3 名同谋之后公开评分、高控制欲者更不从众。**

6 · Other characteristics + lens 1 check

Four more characteristics 四个补充

Characteristic	Typical link (fill the gaps)
Low self-esteem	Do not trust your own j _____ → others' judgements fill the gap
High need for social approval	Being liked matters most → a _____ with the group is safest
Anxiety	Anxious people look to o _____ for cues
Insecurity	Unsure of your standing → the group's opinion feels h _____

Lens 1 · mixed drill 混合小练

Name the study from its description:

1. A meta-analysis showing higher external LOC scores with greater conformity. → _____
2. Externals more persuaded by a high-prestige source. → _____
3. High desire-for-control participants conformed less on cartoon ratings. → _____
4. Internals reacted against overt influence. → _____

中文理解 一个共同主题

低自尊、需要认可、焦虑、不安全感 → 都是在说**对自己的判断不够自信**。越没把握，越需要「跟着别人走」的安全感。

7 · Situation: size of the groups

Majority size 多数派规模

Asch found a majority of t _____ was o _____ — and any greater number did not exert g _____ influence.

Minority size: both arguments 少数派规模

Case for large	Case for small
More v _____ presence — harder to ignore	Can still be effective if the a _____ is strong and c _____

Risk for small	Risk for large
Discounted as e _____ or eccentric	Seen as "just another g _____" rather than a cause

AO3 hook 现成素材

What two words does the textbook use about minority-size research? _____

中文理解 有最优人数 vs 没有定论

多数派：3 人封顶（饱和效应）。

少数派：**research is mixed**——大有大的显眼，小有小的聚焦。写答案别只写一边。

8 · Situation: unity of the majority

The quotable numbers 必背数字

When a majority is b _____, conformity fell from _____% to _____%.

Why such a collapse? 为什么崩塌

A united majority says "*everyone agrees, so you must be wrong.*" A broken majority says "*r _____ people can disagree.*" The social c _____ of disagreeing suddenly drops.

Lens 2 · quick drill 情境小练

1. State Asch's optimal majority size and what happens beyond it.

2. Quote the two percentages for unity of the majority.

中文理解 一句话记忆

团结时反对＝对抗全世界（33% 从众）；一个同盟军开口，从众率跌到 **5.5%**——只剩原来的**六分之一**。
考「unity」必配这组数据。

9 · Situation: ambiguity & the source

Ambiguity 模糊情境

If a situation is a _____ or uncertain, we conform because others' opinions provide i _____ we need. This is **informational** social influence — so the change is more p _____.

The source 来源

A source with s _____, reputation, c _____ or expertise influences others — whether it is a majority or a m _____. Example: environmental campaigners have scientific support and prominent leaders such as G _____.

Channel sorter 通道判断

Scenario	NSI or ISI?	Persistent?
Tourist follows the crowd to an exit in a confusing station		
Student laughs at a joke because the whole group laughs		

中文理解 越不懂，越跟人
看不懂指示牌（模糊）→ 别人走的方向成了「信息」(ISI)。
记住：**ISI 的改变更持久**——你真的把信息当答案了。来源可信度这条和 1.1.6 呼应：少数派要被听见，也得有 credibility。

Studies 1–3 记分板上半

Study	Who was tested	Finding (fill the gaps)
Neto (1995)	Female Portuguese university students	H _____ rate of conformity than Asch
Whittaker & Meade (1967)	Brazil and Zimbabwe	Brazilians: s _____ rates to Asch; Zimbabweans: g _____ conformity
Chandra (1973)	Native Fijians vs Indians	Fijians more conforming; they displayed _____ % — comparable to Asch's Americans

Direction tracker 方向标

So far: higher than Asch → _____; similar → _____.

中文理解 别背国家，背对比

上半记分板：更高（葡萄牙女生、津巴布韦、斐济 36%）；持平（巴西）。
考试写得出 1–2 个具体研究＋方向，就够 2 分。

11 · Culture: the scoreboard (2 of 2)

Studies 4–7 记分板下半

Study	Who was tested	Finding (fill the gaps)
Timaeus (1968)	German students	L _____ conforming than Americans
Milgram (1961)	Norwegians	H _____ conformity
Perrin & Spencer (1980)	England	A virtual a _____ of conformity
Triandis et al. (1988)	Japanese vs US students	Japanese conformed less in general, but differentiated i _____-groups from o _____-groups — more conformity to fellow students than strangers

Direction tracker 方向标

Lower than Asch → _____

AO3 gem 好用的反例

Perrin & Spencer found almost no conformity in England. What does that tell you about treating Asch's 32% as a human universal?

中文理解 三组对比记全部

① 更高：葡萄牙、津巴布韦、挪威、斐济；② 更低：德国、英国、日本人对陌生人；③ 持平：巴西。

Triandis 的加分点：**日本人对内群体从众、对外群体不从众——**和 1.1.6 的 ingroup 呼应。

12 · Berry (1967): two ways of living

Two subsistence cultures 两种生计文化

	The Temne（Sierra Leone）	The Canadian Inuit
Food	A single c _____ of food	H _____-gatherers
Cooperation needed?	Harvest requires c _____	Rely l _____ on collective effort
Conformity found	H _____ rates	L _____ rates

The method 方法

Berry used an a _____ of Asch's l _____ study.

The causal chain 因果链

subsistence way of getting food → cooperative values instilled in the culture → conformity level

中文理解 饭碗怎么来，性格就怎么长

种单一作物＝全村必须配合农时 → cooperation → 从众高；狩猎采集＝各凭本事 → 从众低。

这是「文化影响从众」最漂亮的因果链，答题三环都写上。

13 · Smith & Bond (1996): the big test

Key term 关键术语

Smith & Bond (1996)

A m _____-analysis of _____ conformity studies using an Asch-type procedure, across _____ collectivistic and individualistic countries. Collectivistic countries showed h _____ conformity.

Why collectivists conform more 解释

Collectivistic cultures emphasise group c _____ and i _____, so social norms are expected to be adhered to. Individualistic cultures nurture greater i _____ and are more t _____ of dissent.

The caveat 课本的限制句

While we can draw general conclusions, there are many v _____ that influence conformity, so the exact influence of s _____-c _____ factors cannot be d _____.

中文理解 三个文化研究递进

① 各国各测一次（记分板）→ ② Berry 给因果解释（生存方式→价值观→行为）→ ③ Smith & Bond 用 133 项、17 国做总结：集体主义 > 个人主义，但**变量太多，确切影响无法确定**。

三步 = 「现象 → 解释 → 总检验」。

Two strengths 优势

Strength	Reason
1. Named evidence for each factor	Biondo; Ritchie & Phares; Burger (1987); Asch's manipulations; Smith & Bond's 133-study meta-analysis
2. Three lenses complement each other	Person, situation and culture each explain what the others c _____

Two limitations 限制

Limitation	Reason
3. Evidence is mixed, context-dependent	Avtgis: depends on type and s _____ of persuasion; minority-size research m _____; Perrin & Spencer: no conformity in England
4. Socio-cultural influence cannot be isolated	Many variables — culture is entangled with e _____, era, task and s _____

中文理解 AO3 的两把刀

① **"evidence in this area is mixed"**（LOC、少数派规模）；② **"the exact influence of socio-cultural factors cannot be determined"**（变量太多）。
优势面写「三层证据 + 三视角互补」。

The textbook's three questions 课本三题

Each 2 marks. Formula: **Point + because** — one sentence of factor, one sentence of mechanism.

Drill the three drawers 抽屉演练

1. Explain one individual difference that may influence conformity. (2)

2. Explain one situational factor that may influence conformity. (2)

3. Explain one factor associated with culture that may influence conformity. (2)

Model shape 参考形状

"An internal locus of control, *because* people who believe they control their own outcomes feel less pressure to fit in, so they resist normative social influence." — factor + mechanism, nothing more needed for 2 marks.

AO1 cloze 主干填空

Conformity varies with individual differences, situation and culture. I _____-controlled people resist normative social influence; e _____-controlled people conform more (Avtgis, _____, meta-analysis). People with a high d _____ for c _____ are assertive and resist: Burger (_____) found they conformed less when rating cartoons after three c _____. Asch found three is the optimal majority size and a broken majority cut conformity from _____% to _____%; a _____ situations raise conformity through informational social influence, and credible sources (like Greta T _____) influence more. Berry (_____) found the cooperative Temne conformed more than the I _____, and Smith & B _____ (_____) found collectivistic countries conform more across _____ studies in _____ countries.

AO3 cloze 评价填空

However, the evidence is m _____: the LOC link depends on the type and source of persuasion, minority-size research is inconclusive, and Perrin & S _____ (_____) found a virtual absence of conformity in England. Because many v _____ influence conformity, the exact influence of socio-cultural f _____ cannot be determined.

Self-check 自查

☐ Both "controls" distinguished ☐ Burger's five details ☐ 33 → 5.5 quoted ☐ 3 named culture studies ☐ Mixed-evidence caveat

17 · Write it out: the three students

The question 题目

Three students join the same school club. Amara rarely changes her mind no matter what the group thinks; Ben goes along with whatever the loudest members say; Chi keeps her opinions even when visiting her cousin's school abroad, but notices students there agree with each other much more. Explain one individual difference, one situational factor and one cultural factor that may influence conformity, using the students as examples. (6 marks)

Your answer 你的答案

p.2–3 抽屉与控制点

- p.2: **d**esire for **c**ontrol; social **a**pproval; **u**nity; **s**tatus; **c**ollectivistic / **i**ndividualistic. Sorter: 2 / 3 / 1 / 2.
- p.3: **c**ontrol; my **a**ctions; **l**uck; **o**thers ×2; **n**ormative ×2. Quick check: external — and it predicts more conformity (relies on others' opinions).

p.4–6 证据链

- p.4: **E**xternals; against; **p**restige; **M**eta; **c**onformity; **m**ixed. Meta-analysis: other people's data.
- p.5: **B**urger, **C**ooper (1979); **m**otivation; assertive, decisive, passive; resist; belief; motivation.
- p.6: **55**; **f**our; **f**unniness; 1–100; publicly; confederates. Opinion; established; normative; **l**ess.

p.7–9 补充与情境

- p.7: judgement; agreeing; others; heavier. Names: Avtgis (1998); Ritchie & Phares (1969); Burger (1987); Biondo et al. (1971).
- p.8: **t**hree; **o**ptimal; greater; visual; argument, consistent; extreme; group; **research is mixed**.
- p.9: broken; 33; 5.5; reasonable; cost.

p.10–14 情境与文化

- p.10: ambiguous; information; persistent; status, credibility; minority; Greta Thunberg. Sorter: ISI + persistent / NSI + not.
- p.11: higher; similar; greater; 36. Tracker: Neto, Whittaker & Meade, Chandra; Brazil.
- p.12: less; higher; absence; in-, out-. Tracker: Timaeus, Milgram (1961), Perrin & Spencer, Japanese towards strangers. AO3: Asch's effect is not a universal — culture moderates it.
- p.13: crop; hunter; cooperation; less; higher; lower; adaptation; line.
- p.14: meta; 133; 17; higher; cooperation, interdependence; independence, tolerant; variables; socio-cultural; determined.

p.15–17 评价与骨架

- p.15: cannot; source; mixed; education, sample.
- p.17 AO1: internal, external, 1998, desire, control, 1987, confederates, 33, 5.5, ambiguous, Thunberg, 1967, Inuit, Bond, 1996, 133, 17. AO3: mixed, Spencer, 1980, variables, factors.
- p.18 model: Amara = internal LOC / high desire for control; Ben = united, loud (high-status) majority; Chi = collectivistic culture (Smith & Bond, 1996) with the caveat that exact socio-cultural influence cannot be determined.

Brain dump 最终默写

Close the booklet. From memory, write: the three drawers (1 line) · locus of control with one study (2 lines) · 33% → 5.5% with why (1 line) · Berry's causal chain (1 line) · Smith & Bond numbers (1 line). Any blank line = revisit that page today.
