What this workbook covers 本册讲什么

The classic study of minority influence: two confederates keep calling blue slides green, and the textbook turns their stubbornness into numbers. This booklet drills the three aims, the sample and task, the three experiments (seating variation, the private test, the inconsistent minority), the result numbers (**8.42% / 0.25% / 32% / 57% / 1.25%**), the conclusion about the **perceptual code**, and the evaluation plus improvement.

How to use this booklet 怎么用

1. **Fill it in as you go** — check the answer key (pp. 19–20) after each page.
2. **Page 11 (results numbers) and page 16 (the improvement question) matter most.** Both are direct exam shapes from the textbook.

Content map 内容地图

Page	Topic	What you must be able to do afterwards
p.2–3	Vocabulary & aims 词汇与目的	Define perceptual code; recite the three aims as questions
p.4–6	Sample & task 样本与任务	Sample composition; the 36-slide task; the vision check
p.7–10	Three experiments 三个实验	Seating variation; private test; inconsistent minority; controls
p.11–13	Results & conclusion 结果	Recall all five numbers; perceptual code vs social response
p.14–15	Evaluation 评价	Two strengths, three weaknesses, each with its consequence
p.16–17	Exam skills 考试	Improvement question; state-two-results question
p.18	Brain dump 演练	Dump every number and term from memory
p.19–20	Answer key 答案速查	Mark honestly, then re-write wrong answers in full

Revision tracker 复习打卡

☐ p.2–3 vocabulary & aims ☐ p.4–6 sample & task ☐ p.7–10 experiments ☐ p.11–13 results ☐ p.14–15 evaluation
☐ p.16–17 exam skills ☐ p.18 brain dump

The whole study in one sentence 一句话总结

A consistent minority of two shifted the answers of a naive majority of four (**8.42%** vs a control baseline of **0.25%**), and it shifted them **deeply**: even people who never said "green" aloud later judged colours privately towards green, so a consistent minority modifies the majority's **perceptual code** more than its social response, while an inconsistent minority collapses to **1.25%**.

Vocabulary + The three aims

Fill the gap 填空

Minority influence is when a small group changes the views or perceptions of a _____ group. Here it was tested with _____ confederates against _____ naïve participants.

A **perceptual code** is a way of _____ or interpreting information. When a minority consistently presents a viewpoint, it can _____ the majority's perceptual code.

Consistency means the minority _____ changes its answer: the confederates said the blue slides were _____ every single time.

Confederate check 托儿是谁

A confederate is someone working for the _____ who pretends to be a _____. In each group of six, _____ were confederates and _____ were real.

中文理解 三块积木

少数派影响：人少的一方掰动多数的一方。
知觉编码：大脑把颜色"翻译"给你的一套规则，少数派挑战的就是它。
一致性：从头到尾咬死一个答案。三个实验的对比全靠它撑着。

Aims as questions 目的变问题

1. Can social pressure from a _____ influence a _____ into giving an _____ response, on a colour perception task?

2. Would a _____ minority exert a greater influence than an _____ minority?

3. Does minority influence create only a change in _____ response, or also an actual change in _____?

Match aim to experiment 目的对实验

Aim	Which part of the study answers it
Can a minority move a majority?	
Consistent vs inconsistent	
Words only, or perception too?	

中文理解 三问对三实验

问一 → 主实验；问二 → 实验三（托儿改成 green 24 次、blue 12 次）；问三 → 实验二（隔开、写答案）。
考题最爱点名某个目的问"哪部分测的"，这张表就是答案。

Sample + The colour task

Fill the table 填表

Feature	Detail
Who	All participants were _____ students of liberal arts, law or _____ science.
Group size	Placed in groups of _____.
Who was real	_____ confederates; _____ naïve participants.
Why female	The researchers thought women would have a greater _____ in evaluating colour.

One-line evaluation seed 评价种子

All-female, all-student, all-American. Each of those three words will later cost the study one evaluation point. Underline the one you think a question is most likely to target, then check p.15.

中文理解 样本两句话

第一句报构成：女学生，文科/法律/社科，六人一组，两托儿四真。
第二句报理由：研究者认为女性对颜色判断更投入。
这两句写全，sample 题的分就稳了。

Numbers drill 数字操练

Six slides, each shown _____ times, for _____ seconds per slide: _____ judgements per participant in total.

Two answers per slide: say the _____ out loud, and rate _____ intensity on a scale of _____ (0 dimmest, 5 brightest).

The slides were all _____ coloured, projected using coloured filters.

The two confederates _____ reported the slides were green.

Order of events 排顺序

Number these 1–4: group seated in a row facing the screen · _____ · practice trial · each slide shown one at a time

中文理解 36 这个数怎么来

6 张幻灯片 × 每张放 6 遍 × 每遍 15 秒。三个数相乘，就是每人 36 次判断。
再加一个亮度打分当掩护，任务看起来才像正经的视知觉测量。

The vision check + Variation one: where they sat

Fill the gap 填空

All group members were given a test to check for _____ _____.

Job 1: anyone with visual problems could be _____ from the study.

Job 2: participants knew everyone in the group had _____ colour vision, which avoided naïve participants considering the judgements of the minority as incorrect because of _____ issues.

Why it matters 为什么重要

Complete the logic chain: if someone says "green" and you know their eyes are fine, the only remaining explanation is _____. That is exactly the situation the study needed.

中文理解 一石二鸟的控制

测视力，明面上是筛掉色觉异常的人；暗地里是让所有人**亲眼看见**大家都测过。
于是"他说绿"只剩一种解释：他真这么判断。控制做得越严，社会解释越干净。

Fill the table 填表

Groups	What the confederates did
_____ groups	Sat next to each other; gave the _____ and _____ responses of the group.
_____ groups	Gave the _____ and _____ responses, making the second confederate appear _____ of the first.

The finding 发现

There was _____ difference between responses given under the two arrangements. Influence stayed the same.

中文理解 拆开坐测什么

挨着坐像"一伙的"；一个答第 1 位、一个答第 4 位，第二个托儿看着像独立判断。
结果一样：起作用的是"又有人说绿"这件事，托儿之间的距离排不上号。

Experiment two: the private test + Experiment three + controls

Fill the gap 填空

_____ groups completed experiment one, then consented to another researcher's study on the effect of _____ on visual phenomena.

Participants sat around a table, isolated by _____ screens, and judged colours _____ by writing them down.

The discs: three _____, three _____, and ten _____. Each shown for _____ seconds.

Designed to detect 设计意图

① whether experiment one had a _____ effect on perception for those who yielded; ② whether participants who did _____ publicly yield had still changed their _____.

中文理解 这个实验的干净之处

换研究员 + 纸板隔开 + 写答案：没人听、没面子、看起来是另一个实验。
这时候答案还偏绿，就只能解释成**知觉编码被动过**。嘴上那套社交表演全被拆掉。

The inconsistent minority 不一致版

_____ groups were tested. The confederates said the slide was green _____ times and blue _____ times, demonstrating _____.

The control groups 控制组

A control group of _____ participants made colour judgements in groups of _____ with _____ confederates present. There was a control group for _____ of the experiments.

What the control gives 控制组给什么

The control said green for only 0.25% of answers. That near-zero baseline is what lets Moscovici claim the green responses in the experimental groups came from _____ _____.

中文理解 三个实验一张图

主实验（咬死绿）→ 实验二（私下写）→ 实验三（绿 24 蓝 12）。
每个实验都配 22 人、无托儿的控制组。控制组的 0.25% 是整座大厦的地基。

Results check — get the numbers out + Results: experiments two and three

Cover and recall 遮住再背

Result	Number (fill from memory)
Green responses, experimental groups (first two experiments, n = 128)	
Green responses, control group (22 participants)	
Naïve participants who conformed at least once	
In yielding groups, naïve participants matching the confederates	
Agreement with the inconsistent minority (experiment three)	

Also know 还要知道

- Seating: no difference between first-and-second and first-and-fourth positions.
- Light intensity: influence was greatest when intensity was _____, but green was always higher in experimental than control groups.
- Interviews: agreeing participants saw a range of _____ shades; non-agreeing participants said simply _____.

中文理解 五个数字一条线

8.42（一致少数派）→ 0.25（没人推）→ 1.25（不一致）→ 32%（至少跟一次的人）→ 57%（被拉动组里的比例，平均每组两人）。
数字是这题的血条：state-two-results 题全靠它们续命。

Fill the comparison 填对比

Experiment two	Experiment three
Those who did not publicly agree were _____ likely to shift their judgement in phase two	Only _____ % of responses agreed with the inconsistent minority
Read as a modification in the _____ _____	Consistency is an important _____ _____

The mirror-image idea 镜像想法

Majority influence tends to change what people _____ (social response). A consistent minority tends to change what people _____ (perceptual code). The direction of pressure and the depth of the change go together.

中文理解 最妙的一处

嘴上没跟的人，私下写答案反而更偏绿。憋住的话没改变想法，想法自己动了。
这就是"少数派改的是怎么想"的实验证据，也是这研究能当 classic 的底气。

Conclusions + Evaluation: strengths

Four textbook sentences 四句结论

1. Minorities can exert some, albeit _____, influence in a laboratory situation, particularly if they are _____.

2. A consistent minority can modify the _____ _____ or norm of a majority.

3. A consistent minority is more capable of modifying the majority's perceptive _____ than their social _____.

4. This contrasts with _____ influence, which is more likely to influence a _____ response.

ISI link 信息性社会影响

Post-experimental interviews suggested the majority were genuinely weighing the minority's view. The textbook suggests this could be because the minority were exerting _____ _____ _____ (you conform to others because you believe they know something you do not).

中文理解 结论两句话版
对外说：一致的少数派能小幅度影响多数派，而且改得深（知觉层面）。
对内比：多数派影响改"说什么"，少数派影响改"怎么看"。一深一浅，正好相反。

Headline verdict 总评

The study used a highly _____ procedure with variables tightly _____. The payoff: the study can be _____ to check whether minority influence is a consistent outcome.

Three controls, three jobs 三个控制

Control	What it achieved (fill in)
The vision test	
_____ allocation to experimental or control group	
Altering and analysing different _____ _____	

中文理解 强度怎么写
句式：standardised procedure + tightly controlled variables + **can be replicated**。
再从三个控制里挑一个展开（最好写视力测试），一段就够两分。

Evaluation: limitations + The improvement question

Three weaknesses 三个弱点

Weakness	The claim	The consequence (fill in)
Sample	Only female liberal arts, law and social science students	Findings may not represent _____ or non-students; conformity to a minority tested on one population only
Culture	Only _____ students used	Cross-cultural research shows considerable _____ in social influence between countries
Setting	Laboratory environment is _____	Low _____ validity; cannot be sure minorities exert the same influence in real situations

Honest sizing 诚实的分量

The textbook calls the influence "some, albeit small". A fair evaluation weighs the size of the effect (8.42%, two against four) as well as its significance.

中文理解 三条弱点一句诀

管**人**（只有女学生）、管**地方**（只有美国）、管**场景**（实验室太干净）。
每条配一句"所以结论只能推到哪"，弱点题就满了。

The rule 规则

You must suggest a suitable improvement that will actually improve the study. Identify it by considering the weaknesses. You must also _____ why your improvement will improve the study.

The textbook's worked example 范文

"One improvement to Moscovici's research would be to use _____ and _____ participants as Moscovici only used female students. This would be a more _____ sample so that we can be sure the minority influence over a majority would extend to the wider population and increase _____."

Build your own 自己搭一个

Weakness you pick: _____ → your fix: _____ → justification: _____

中文理解 改进题三步走

弱点 → 修法 → 为什么更好。只写修法不给理由，两分只拿一分。
范文走的正是这个结构：男女都招 → 更有代表性 → generalisability 上升。

15 · Exam skills I — state two results

In social psychology, you will have learned about one classic study in detail: Moscovici et al. (1969) Influence of a consistent minority on the responses of a majority in a colour perception task. (a) State two results of Moscovici et al.'s (1969) study. (2 marks) (b) Suggest one improvement that could be made to Moscovici et al.'s (1969) study. (2 marks)

Plan (a) 列提纲

Result 1 (with numbers): _____

Result 2 (with numbers): _____

Plan (b) 列提纲

The fix: _____

Why it improves: _____

中文理解 评分感觉

(a) 每条结果必须带数字或明确对比，光说"有人跟风"不给分。
(b) 修法 + 理由缺一不可。两个小题都是一分一个点。

16 · Exam skills II — the weakness question

Explain one weakness of Moscovici et al.'s (1969) study. (from the chapter checkpoint)

The chain 链条

Name the weakness → who or what is missing → what the conclusions can no longer claim.

Weakness: _____

Missing: _____

Consequence for conclusions: _____

Second run 换一条再写

Pick a different weakness (culture or ecological validity) and run the same chain in three bullet points:

中文理解 链条万能

任何 study 的 weakness 题都能套：**点名 → 缺谁/缺什么 → 结论受限**。
练两条不同的，考场上挑顺手的写。

Dump everything 先自测

Cover everything. Write: the three aims; the sample composition; the 36-slide task; the three experiments; all five result numbers; the conclusion about the perceptual code; two strengths and two weaknesses:

The 60-second drill 一分钟自检

- ☐ 6 人一组：2 托儿 + 4 真
- ☐ 6 张 × 6 遍 × 15 秒 = 36 次判断
- ☐ 一致说绿；实验三 green 24 / blue 12
- ☐ 8.42% vs 0.25%，32% 至少一次，57%（被拉动组）
- ☐ 实验二：没公开跟的人私下偏移
- ☐ 1.25%：不一致少数派崩盘
- ☐ 结论：少数派改 perceptual code，多数派改 social response
- ☐ 强度：standardised + 三控制
- ☐ 弱点：女学生 / 美国 / 实验室

Answer key pp.2–10 答案（上半）

- **p.2** larger (majority); two, four; perceiving, challenge; never, green. Researchers; participant; two, four.
- **p.3** minority, majority, incorrect; consistent, inconsistent; verbal, perception. Main procedure / experiment three / experiment two.
- **p.4** female, social; six; two, four; involvement.
- **p.5** six; 15; 36; colour; light; 0–5; blue; consistently. Order: seated → vision test → practice trial → one at a time.
- **p.6** visual, abnormalities; removed; good (normal), visual. Social influence.
- **p.7** 12; first, second; 20; first, fourth; independent. No.
- **p.8** Ten; exercise; cardboard; privately; blue, green, ambiguous; five. Lasting; not, perceptual code.
- **p.9** 11; 24, 12, inconsistency. 22; six; no; each. Minority influence.
- **p.10** 8.42%; 0.25%; 32%; 57% (average two per group); 1.25%. Weak; green-blue; blue.

Answer key pp.11–17 答案（下半）

- **p.11** more; perceptual code. 1.25; behaviour style. Say; see.
- **p.12** small; consistent. Perceptual code. Code; response. Majority; social. Informational social influence.
- **p.13** standardised, controlled; replicated. Removed anyone with visual problems and showed all had normal vision; random; bias of personality types clustering; light intensity; controlled light's effect on perception.
- **p.14** males; American; variation; artificial; ecological. Three seeds: female students only / American only / laboratory task.
- **p.15** justify. Male, female; representative; generalisability.
- **p.16 (a)** e.g. green responses 8.42% experimental vs 0.25% control; 32% conformed at least once. **(b)** male and female participants → more representative → increases generalisability.
- **p.17** chain: name → missing group → limited generalisability. Sample: all-female students, males and non-students missing, conclusions limited to female students. Culture: Americans only, cross-cultural variation. Setting: artificial lab, low ecological validity.

Last look 最后过一遍

8.42 / 0.25 / 32 / 57 / 1.25｜36 张幻灯片、15 秒一张｜一致才有力（8.42 对 1.25）｜**少数派改知觉，多数派改说法**｜强度靠控制，弱点在样本、文化、场景｜改进题：弱点 → 修法 → 理由。
