**What this workbook covers 本册讲什么**

The contemporary study of obedience: Jerry Burger rebuilt Milgram's experiment in 2009 under modern ethics, stopped it at **150 volts**, and found **70%** of the baseline condition still went to continue. This booklet drills the two-stage screening, the baseline and modelled refusal conditions, the numbers against Milgram's 82.5%, the conclusion about the power of the situation, and every evaluation point the textbook makes.

## How to use this booklet 怎么用

1. **Fill it in as you go** — check the answer key (pp. 19–20) after each page.
2. **Page 4–6 (screening) and page 11 (70% vs 82.5%) matter most.** The screening question is a real exam question from the textbook.

## Content map 内容地图

| Page | Topic | What you must be able to do afterwards |
|---|---|---|
| **p.2–3** | Background & aim 背景与目的 | Why replicate; what "partial" and "today" carry |
| **p.4–6** | Screening 筛查 | Both screening rounds; four scales; MINI; final 70 |
| **p.7–10** | Procedure 程序 | Baseline setup and shocks; modelled refusal; safety rail |
| **p.11–14** | Results & conclusion 结果 | 70 / 63.3 / 82.5; gender and personality; conclusion |
| **p.15–17** | Evaluation 评价 | Ethics fixed and unfixed; partial replication; validity trio |
| **p.18** | Brain dump 演练 | Dump the design and numbers from memory |
| **p.19–20** | Answer key 答案速查 | Mark honestly, then re-write wrong answers in full |

## Revision tracker 复习打卡

☐ p.2–3 background & aim ☐ p.4–6 screening ☐ p.7–10 procedure ☐ p.11–14 results ☐ p.15–17 evaluation ☐ p.18 brain dump

**The whole study in one sentence 一句话总结**

Burger partially replicated Milgram with modern ethics: rigorous two-stage screening, a hard stop at 150 volts, and a visible refusal condition. Obedience held (**70%** baseline vs Milgram's **82.5%**), watching dissent changed nothing (**63.3%**), so the **power of the situation** survived 45 years, while whether participants would have obeyed further remains only an **assumption**.

## 1 · Why replicate Milgram?

### Fill the gap 填空

In 2009, _____ decided to replicate Milgram's (_____) study in contemporary society. He too was interested in whether people would obey an _____ figure.

Some psychologists believe people today are more _____ of the consequences of unthinkingly following orders, so they would _____ their actions when asked to cause potential injury.

Burger believed that despite the large _____ gap, his study would still produce similar levels of _____. Society's culture and values had changed, but he felt this would not have a _____ effect on obedience.

### The second constraint 伦理约束

Milgram's study had been subject to _____ criticism, so Burger adapted his research to adhere more closely to current ethical guidelines and cause _____ participant distress.

**中文理解 两个赌注**

赌注一：**四十五年不会磨掉服从**（社会变了，情境的力量没变）。
赌注二：现代伦理标准下**实验还能做**，只要把最伤人的部分切掉。
整个设计（筛查、150 伏叫停）都是从这两个赌注推出来的。

## 2 · Aim and key words

### Fill the aim 填目的

To investigate _____ by _____ replicating Milgram's (1963) study, to examine whether obedience to an authoritative figure would still be _____ today.

### Two words that carry marks 两个词

| Word | What it means for the design |
|---|---|
| **Partially** | |
| **Today** | |

**中文理解 目的题怎么答**

抄目的句不丢人：**"partially replicating Milgram's (1963) study… still be present today"**。
顺手补一句：partial = 停在 150 伏；today = 检验旧结论在新世界的存活率。

## 3 · First screening

### Fill the table 填表

| Question asked on the phone | Why it was asked |
|---|---|
| Been to college? Taken psychology lessons? | Anyone with _____ or more psychology classes excluded, to rule out people familiar with _____ |
| Physical and psychological health? | |
| Traumatic childhood experiences? | |

### Numbers 数字

Adverts promised _____US$_____ for taking part in _____ 45-minute sessions. A further _____ % of participants were excluded after this health and history screening.

**中文理解 第一轮管什么**

第一轮电话筛查管**两种人**：学过两门以上心理学的（可能认出 Milgram 的实验），以及身体、心理或童年创伤有风险的。

再顺手排除 30%。一句话：**知情者和易受伤者，先请出场。**

## 4 · Second screening

### The four scales 四个量表

| Questionnaire | Items | What it measures |
|---|---|---|
| Interpersonal Reactivity Index | | |
| Beck Anxiety Inventory | | |
| Desirability of Control Scale | | |
| Beck Depression Inventory | | |

### The MINI interview 访谈

Each participant was interviewed by a _____ psychologist, structured around the _____ procedure, which touches on psychological _____. Each interview lasted about _____ minutes.

In total, _____ individuals took the second screening and _____ (_____%) were removed, but allowed to gain their money as advertised.

**中文理解 第二轮管什么**

量表（共情 / 焦虑 / 控制欲 / 抑郁）+ 30 分钟 MINI 访谈，全由**临床心理学家**主持。
123 人筛掉 47 人（38.2%），钱照付。这份谨慎就是评价题里 ethics strength 的原材料。

### Numbers drill 数字操练

_____ individuals were invited back a week later, but _____ dropped out, _____ of whom expressed awareness of Milgram's research.

Final sample: _____ males and _____ females = _____ participants.

Age ranged from _____ to _____ years, with a mean of _____ years.

### Compare with Milgram 和 Milgram 比一比

Milgram's participants were men aged 20 to 50. Burger's sample adds _____, stretches the age range to _____, and varies education and _____. This difference will matter twice: once as a strength (population validity) and once as a limitation (see p.17).

**中文理解 样本三句话**

29 男 41 女，共 70 人；20 到 81 岁，平均 42.9；广告 + 电话 + 网上招募，到场先收 50 美元。
一句评价种子：范围广是好事，但被筛掉的 47 人让结论只对心理健全的人负责。

## 6 · Baseline: setting up

### Fill the steps 填步骤

_____ participants were randomly assigned to the baseline condition (and _____ to modelled refusal).

The experimenter and confederate were selected for their _____ to those in Milgram's study.

Participant and confederate were both given _____ and told to keep it _____ if they withdrew.

The role choice was _____: the confederate always became the _____, the participant the _____. Both signed _____ forms.

The teacher watched an electrode strapped to the learner's _____ wrist and heard about the learner's _____ problem.

The teacher read out a list of _____ word pairs; each wrong answer meant a _____ shock.

**中文理解 复刻的痕迹**

相似的服装、相似的脚本、抽签作弊、25 对单词、心脏病台词：Burger 把 Milgram 的舞台原样搭回来。
舞台越像，"45 年后还服从"这个结论越硬。

### Timeline fill 时间线填空

| Point | What happened |
|---|---|
| Sample shock | The learner was given a _____-volt sample shock |
| _____ volts | Pre-recorded grunts became audible |
| _____ volts | A standard recording of the learner demanding to be released and complaining of heart issues |
| After the prods | If the teacher was still resistant, the experiment _____ |
| After the experiment | The experimenter immediately admitted the shocks were _____ and introduced the teacher to the _____ |

### The prods 提示语

The _____ verbal prods from Milgram's study were used unchanged.

**中文理解 全场只有一个开关**

150 伏 = 学习者喊停的那一刻。**想继续 = 服从；拒绝 = 异议**。150 伏之后的一切从未发生。
评价题的"objective measure"就落在这个开关上：它不需要任何人解释。

## 8 · Modelled refusal

### Fill the differences 填不同点

_____ confederates were used instead of one; the second was the same _____ as the real participant.

Roles: a learner (confederate), _____ 1 (a confederate) and _____ 2, the real participant.

At _____ volts, Teacher 1 hesitated after hearing the learner grunt.

At _____ volts, Teacher 1 stated "_____", was prompted by the experimenter, refused, and pushed the _____ back from the table.

The experimenter then asked _____ to continue.

### What it tests 测什么

The visible refusal is a model of _____, hence the name. Milgram found a dissenting peer sharply cut obedience; Burger checked whether that effect still _____ today.

**中文理解 有人带头就有用吗**

Teacher 1 在 75 伏犹豫、90 伏说"I don't know about this"然后起身走人，全套演给真被试看。
结果 63.3% 还是想继续。**带头反对在今天也不好使**，这本身就是结论的一半。

## 9 · The safety rail (ethical adaptations)

### Six adaptations 六项改进

| Adaptation | Detail (fill in) |
|---|---|
| Rigorous screening | |
| Right to withdraw, _____ times | |
| A gentler sample shock | _____ volts rather than the _____ volts in Milgram's study |
| Clinical psychologist as experimenter | |
| Immediate debrief | |
| The hard stop at _____ volts | |

**中文理解 安全栏背六条**

筛查 / 三次告知退出权 / 15 伏样品电击（Milgram 是 45）/ 临床心理学家主试 / 即刻汇报 / 150 伏硬停。

六条里挑三条展开，ethics strength 题就够写。

### Numbers 数字

In the baseline condition, _____% of participants had to be stopped before attempting to continue past 150 volts.

That rate is just lower than Milgram's _____% found in his variation experiment _____.

### Read the gap 读差距

The two experiments stop at different points: Milgram let participants run to 450 volts; Burger stopped at 150. So Burger's 70% is a lower-bound estimate of what Milgram measured. Exam-safe wording: _____

---

**中文理解 70 对 82.5**

差 12.5 个百分点，但量尺不同。**答案里先报数字，再补一句 "the results were very similar to Milgram's"**。"只能算下限"这句留给评价，用的时候别混。

## 11 · Results: modelled refusal + Table 6.2

### Fill the table 填表（textbook Table 6.2）

| Condition | Stopped at 150V or earlier | Went to continue after 150V |
|---|---|---|
| Baseline · male | 6 (33.3%) | |
| Baseline · female | | 16 (72.7%) |
| Baseline · total | | |
| Modelled refusal · male | | |
| Modelled refusal · female | | 13 (68.4%) |
| Modelled refusal · total | | |
| Milgram's experiment 5 | | |

### Headline finding 头条发现

In the modelled refusal condition, _____% went to continue after 150 volts, despite the expectations held by Burger and the confederate who withdrew. The results were very _____ to the baseline condition.

**中文理解 表格怎么读**

每行对半分：stop 和 continue 的人数加起来 = 该组人数。先记三个总数：**28/40**、**19/30**、**33/40**。
最后一行 Milgram 17.5% 停、82.5% 续，是全表的对照锚。

### Fill the findings 填发现

**Gender:** little difference. In the baseline condition, _____ % of men and _____ % of women pressed the 150-volt switch.

**Empathy and control:** little difference between those who _____ and those who _____.

**One echo:** those who showed reluctance to give shocks _____ in the procedure scored higher on _____ for control in the baseline condition.

### Read the pattern 读规律

Personality tracked _____ hesitation, but not final _____. Discomfort came first; obedience came anyway. That ordering is what "the power of the _____" predicts.

**中文理解 性格只管"多早难受"**

高共情的人更早犹豫，控制欲强的人也更早抗拒，但最后按不按，性格说了不算。
情境说了算。这一条把 1.1.3 的 situational vs dispositional 之争接上了。

### Four conclusion points 四条结论

1. Results in both conditions are _____ to Milgram's research over _____ years ago. Time and culture change did _____ affect obedience.

2. Witnessing another person refuse had _____ effect, so the power of the _____ had a greater effect.

3. No difference between _____, nor did age, education level or _____ have an effect.

4. Some impact of _____: high empathetic concern meant early _____, but this did not ultimately affect obedience.

**中文理解 一句话版**

四十五年过去，同样的情境照样逼出同样比例的服从。带头拒绝没用，性别年龄学历族裔全没用，性格只决定"多早开始难受"。
情境派的正面胜利。

### Two columns 两栏

| What Burger fixed | What stayed worrying |
|---|---|
| ① _____ | ① Participants deliberately placed in a situation that would cause _____ |
| ② _____ | ② The _____ prods could have been understood to remove the previously established _____, even if only temporarily |
| ③ _____ | |
| ④ _____ | |
| ⑤ _____ | |

**中文理解 伦理题的结构**

先列改进（筛查 / 三次退出权 / 15 伏 / 临床心理学家 / 即刻汇报），再补残留（焦虑情境 + prods 变相没收退出权）。只有改进没有残留，两分只拿一分。

### The trade 这笔交易

| Ethical strength | Scientific cost |
|---|---|
| Nobody went beyond 150 volts, so nobody experienced the greater _____ observed in Milgram's study | It can only be _____ that participants would have continued to obey. That assumption rests on Milgram's finding that the majority continued past this point of _____ _____. We cannot be _____ that Burger's participants would have continued |

### Sentence builder 组句

Write one sentence that carries both sides (ethics bought, certainty paid):

**中文理解 全研究最可考的一句**

**"Ethics bought at the price of certainty."** 150 伏硬停保护了被试，同时把 150 伏之后的服从变成了假设。
假设的地基是 Milgram 的 point of no return：迈过 150 伏的人几乎都走到底。

## Population validity 总体效度

| Pushes it up | Pulls it down |
|---|---|
| Males and females; different _____ levels; varied _____; ages 20–81 | _____ participants were not selected after screening; obedience levels may only apply to people without _____ issues such as anxiety or depression |

## Reliability and objectivity 信度与客观性

Standardised: all participants read the _____ instructions and heard the _____ verbal prods, so the research can be retested _____. Objectivity: the 150-volt measure is _____ open to interpretation by other researchers.

## Ecological validity 生态效度

Conducted in a _____ at Santa Clara University. Shocking a stranger over word pairs is unlike real-life obedience (complying with a teacher or parent), so the task lacks _____ _____. The 70% may not be found in an ordinary setting.

**中文理解 一页三考点**

population validity：广（人群多样）对窄（筛掉 47 个脆弱的人）。
reliability + objectivity：标准化 + 150 伏开关。
ecological validity：实验室任务缺 mundane realism。三个名字别写混。

## Dump everything 先自测

Cover everything. Write: the aim; both screening rounds with their numbers; the baseline and modelled refusal procedures; all key percentages; the four conclusions; three ethical adaptations and two evaluation weaknesses:

## The 60-second drill 一分钟自检

- ☐ US$50 · 两轮筛查 · 30% + 47/123 被排除
- ☐ 最终 70 人（29 男 41 女），20–81 岁，均值 42.9
- ☐ 150 伏 = 服从的分界线，超线即停
- ☐ 70%（基线）对 82.5%（Milgram 实验 5）
- ☐ 模范拒绝条件 63.3%，带头反对没用
- ☐ 性别：66.7% 男 / 72.7% 女
- ☐ 性格影响"多早难受"，不影响服从
- ☐ partial replication → 150 伏后只是假设
- ☐ mundane realism 缺失 = 生态效度弱点

## Answer key pp.2–10 答案（上半）

- **p.2** Jerry Burger; 1963; authoritative; aware, reconsider; time, obedience; significant. Ethical; minimal.
- **p.3** obedience; partially; present. Partially = stops at 150 volts; Today = tests whether the 1963 finding survives in 2009.
- **p.4** two; Milgram's original study; to spot obvious risks; distress could reopen old wounds. 50; two; 30.
- **p.5** 28-item, empathy; 21-item, own anxiety against 21 symptoms; 20-item, self-control over one's life; 21-item, severity of depression. Clinical; MINI; disorders; 30. 123; 47; 38.2.
- **p.6** 76; 6; 5. 29, 41, 70. 20, 81, 42.9. Women; 20–81; ethnicity.
- **p.7** 40; 30. resemblance; US$50; even; rigged; learner, teacher; consent; left; heart; 25; stronger.
- **p.8** 15; 75; 150; ended there; not real, learner. Four.
- **p.9** Two; gender; Teacher, Teacher; 75; 90, "I don't know about this", chair; Teacher 2. Dissent; holds.
- **p.10** unsuitable participants not selected; three, informed they could leave without consequence; 15, 45; instructed to stop on excessive stress; debriefed immediately to alleviate distress; 150, nobody experienced anything beyond it.

## Answer key pp.11–17 答案（下半）

- **p.11** 70; 82.5, 5. Exam-safe wording: "Burger found 70% went to continue past 150 volts, a rate very similar to Milgram's 82.5% in experiment 5, suggesting obedience levels changed little."
- **p.12** 12 (66.7%); 6 (27.3%); 12 (30.0%) and 28 (70.0%); 5 (45.5%) and 6 (54.5%); 6 (31.6%); 11 (36.7%) and 19 (63.3%); 7 (17.5%) and 33 (82.5%). 63.3; similar.
- **p.13** 66.7, 72.7; stopped, continued; early, desirability. Early; obedience; situation.
- **p.14** similar, 45; did not; no, situation; genders, ethnicity; personality, reluctance.
- **p.15** ① rigorous screening ② three withdrawal reminders ③ 15-volt sample shock ④ clinical psychologist experimenter ⑤ immediate debrief; anxiety; verbal, right to withdraw.
- **p.16** distress; assumed; no return; certain. Sample sentence: "Stopping at 150 volts protected participants ethically, but it means continued obedience is only an assumption based on Milgram's point of no return."
- **p.17** education; ethnicity; 47; psychological. Same; same; exactly; not. Laboratory; mundane realism.

**Last look 最后过一遍**

70 对 82.5｜63.3 模范拒绝｜150 伏一刀切｜筛查两轮：30% + 38.2%｜**伦理改进六件套**｜150 伏后只是假设｜标准化 + 客观测量｜实验室缺 mundane realism。
